MAN ESSENTIALS

MAN Essentials is your free digital home base, the central link-up point with MAN DigitalServices. All the fundamental information on the vehicles you have registered are available to you at any time: vehicle and driver identification, position, simple trip history, information on vehicle performance, mileage and technical parameters. And all structured so that you can read it at a glance – the ideal tool for you as a fleet manager or scheduler for efficient recording and administration of your fleet and all the basic data.

It's the basis for networking your fleet and for additional services and functions that can be booked in the Marketplace.

The pre-requisite: MAN Essentials can be used only if a RIO Box is installed or with a transmitter unit from RIO.

Services at a glance:

- Address search
- Vehicle identification
- Current vehicle position every 15 minutes
- Simple trip history for up to 10 days in the past
- Driver identification and authentification
- Evaluation of basic data at vehicle level
- Overview of departure checks carried out per vehicle
  (only in combination with use of the MAN Driver App)

- Mileage
- Average fuel consumption
- Average speed
- Idle and driving times
- Engine operating time
