

MAN MAINTENANCE

To help you plan your servicing economically and for the long-term MAN Maintenance offers a complete overview of all the components in your fleet that require servicing. This gives you a clear picture of your vehicles' condition. Servicing and status data are the basis for proactive servicing planning and efficient fleet organization. With your MAN vehicles you also have the benefit of even more detailed data and information – extremely simply too, as this is done remotely via the Cloud. MAN Maintenance supports you in optimising your vehicles' service life and minimising downtimes.

Services at a glance:

- Monitoring of regular statutory servicing intervals: main examination, exhaust-gas examination, tachograph check and safety check
- Transmission of fluid levels per vehicle (fuel, AdBlue, engine oil, windscreen washer fluid)
- Display of status of brake linings per vehicle
- Display of tyre pressure (if the MAN tyre pressure management system TPM is installed)
- Addition of other specific components that require servicing, including due dates
- Export of files to the local computer as CSV file
- Setting of limit values for fluid levels and brake linings
- Reliable servicing planning and flexibility in choice of workshop
- Easy administration of your servicing dates
