

MAN PERFORM

Optimum collaboration between your drivers and your vehicles is an absolute pre-requisite for the success of your business. MAN Perform focuses on the performance data of your drivers. Over the period required it evaluates all vehicle data specifically with regard to driving style and thus provides you with a basis for making comparisons. MAN Perform supplies you as the fleet manager with a complete overview of all relevant data. You will, for example, be informed about all vehicles which are left standing with the engine running for more than ten minutes. Or you can view the current list of your most economical drivers.

Services at a glance:

- Detailed performance analyses for drivers and vehicles
- Driver assessment including detailed evaluation per vehicle
- Analysis of arduousness of deployment, e.g. with regard to route and gross vehicle weight
- Exclusively for MAN Trucks: inclusion of additional information on the vehicle (use of the assistance systems)

Note: MAN Bridge offers limited access to TBM2 data, i.e. access to the full range of functions cannot be guaranteed

Edition 08/2018 - Texts and illustrations are non-binding. We reserve the right to make modifications for reasons of technical progress. All specifications in this publication represent the status at the time of going to press.
