

## **UAE construction specialist Saif Bin Darwish takes 150 heavy TGS WW trucks**

Munich, March 24, 2014

### **A couple of trucks in the 690 MAN fleet clock-up over one million kilometers**

The UAE-based construction company Saif Bin Darwish is taking delivery of 150 heavy MAN TGS 40.440 WW 6x4 tractor heads in March 2014. The order represents a volume of more than 10 million euros.

Saif Bin Darwish is one of the major civil & infrastructure engineering companies in UAE. It has a long relationship in working with MAN, as Andrew Carter, Manager Plant and Rental Division of the company states: "We have trusted MAN for 35 years now and operate a fleet of 690 trucks. With the newly launched TGS WW 6x4 with Aero Package and TipMatic, we have rejuvenated our fleet to the latest standard. Our vehicles have to cope with very rough conditions and operate on and off road, which is why the requirement is for the truck to be robust on the one side but fuel-efficient on the other to achieve optimal performance. Just last year we had three trucks crossing the one million kilometers mark with no major repairs over the last five years. Because of this durability and reliability we decided once again to invest in MAN trucks."

Saif Bin Darwish's Operations Division is primarily responsible for equipment rental and transport. Its main focus is to support the company's projects and to provide material haulage services from the company-owned crusher in Fujairah to customers all over United Arab Emirates.
